

## Lei Kun SVC GECGithub Issues

Ticket#25021 📝 - created 5 days 3 hours ago

FROM Lei Kun <lei.kun@walmart.com>  
TO Users

Lei Kun sent us a message after finding the SharePoint page, they are having issues with the Service Account (XXXXXXXXXX) as its used for some automation for enterprise GECGithub. We will investigate, we might have to reset the credentials

Working this, will do some testing and come back. I might have to also check the logs to see if the account got locked.

Thats great! So checking the logs it looks like the password expired, I just reset the password and was able to [XXXXXXXXXX] Try logging into gecgithub01@wal-mart.com with it.

FROM Nikita Jannat

We are lucky, as the cronjob that removes expired accounts didn't run yet

FROM Nikita Jannat

I made a mistake the url, its gecgithub01.walmart.com. I was helping someone else with PAT's and had it incorrect.
