SUBJECT	Need Help with my GECGithub token not working

Hello,

My name is Durga, I am having issues with a PAT I generated that is not working. I tried using a fine-grained one with what I thought was the right permissions, but it turned out not to be the case. Could you help?

Cool so I see that one of your tokens that was generated with no permissions, what permissions do you need? Also I noticed your domain password was set to expire in 3 days so I went ahead and reset it for you to ensure you do not get locked out. your new password is ▨▨▨▨▨ ▨▨▨▨▨

I need the ability to manage my org that deals with Gift Card ordering (you will see that over there). It is an organization in which I am a member and an admin as you will see. I also need some configurations made to read-and-write permissions on all interactable private repos. I also need ability to manage codespaces user secrets.

Thanks also for resetting the password, Since it is near the end of the quarter I totally forgot and I would have lost many of the deliverables.

Ok so I created the PAT here it is ██████████████████████████ you can test it by cloning one of your repo on gecgithub.

git clone https://██████████████████████████████@gecgithub01.wal-mart.com/Membership-Rewards-Team/wcnp-prod-bulk-giftcardordervalidation.git

For some reason the clone didn't work, it failed. Is this the right token?

Oh ok I see the issue, use this url instead. I used wal-mart instead of walmart.com in the connection string.

git clone https://████████████████████████████@gecgithub01.walmart.com/Membership-Rewards-Team/wcnp-prod-bulk-giftcardordervalidation.git
