SUBJECT	Misplaced a token in GECGithub

AH

Hello,

I want to thanks a lot for helping me with the ticket earlier regarding the ssh keys. I now noticed that I had some keys on my older machine that I just sent back as part of the hardware refresh. Can you help me generate a new PAT for that purpose?

Thanks,

Hello Ajit, which keys were you looking specifically to get updated?

After looking back, I did realized I copied almost all the PAT's. But one of them I had forgot to copy back into my new host. The PAT is named as the wcnp_infra_k8s PAT and it is highly privileged. Can you create a new key for me with the same privledges? Thanks!

Cool. I just generated a new one. the token is you can test it with the following Puppet Deployment repo

git clone https://▨▨▨▨▨▨▨▨▨▨▨▨▨▨▨@gecgithub01.walmart.com/linuxcm/r10k-puppetfile-control.git
