SUBJECT	Specially Made PAT Tokens in GECGithub not working

Hello,

My PAT Token all of a sudden stopped working today, I need to get it fixed as this was a specially privileged token that took multiple change requests and exceptions to be made. This is a very important ask and it needs to be resolved by COB CDT.

Hello Abby hope you are doing well, so I see one PAT Token assigned to your account and it was flagged and set to invalid, GECGithub has recently changed the policies, and your previous token had privileges that were not compliance with the report. I just generated a new token based on the same privileges just removing those access controls that are not allowed anymore.
I made a little connection string you can try let me know if it works

git clone https://▩▩▩▩▩▩▩▩▩▩▩▩▩▩▩▩@gecgithub01.walmart.com/scs-consulting/starterkitdemonew.git

I didn't know that! I didn't see that guidance anywhere, thanks for letting me know I will get to my team as soon as possible and make sure we rotate our PAT's for the future so this doesnt occur again. It did work for me yes I tested it and was able to clone the starterkit thanks a lot have a nice rest of your day!
